ABOUT US

Atlas Project Services is a global provider of integrated facility management, logistics, construction and waste management services for international organizations, governments and private sector clients. True to our principle of transforming difficult into easy, we work with our clients to provide turnkey solutions for their projects, delivering efficiently and cost effectively without compromising standards all over the world.

Our experienced team of staff have worked on thousands of projects, combining years of expertise, operational skills and cultural diversity to ensure the success of mission-critical operations. Regardless of where our staff and operations are, our clients can count on a transparent, ethical and disciplined commitment from Atlas.

1. Base Support Services

Atlas provides a complete support for camp operations ensuring comfortable living and working conditions for clients in self-contained camps. Atlas provides infrastructure support including construction and maintenance as well as life support with services such as laundry, catering, medical services, recreation, staffing and IT support.

Our comprehensive maintenance protocols ensure limited downtime and reliable operation of critical systems. This allows our clients to focus on their essential business and save time and financial resources.

2. Waste Management Services

Waste Management solutions are part of the core of our offering with unrivalled expertise in providing integrated solutions in sprawling urban areas as well as isolated project sites. Atlas provides solid, liquid and hazardous waste management services.

Our comprehensive environmental management solution includes the provision of potable and general use water. Our staff have also built and operated water treatment plants, incinerators and solid waste management facilities around the world.

3. Logistics Services

Atlas provides a robust and dependable multi-modal logistics capability enabling our clients to send and receive goods on time and on budget. Our approach is guided by painstaking planning to develop customized solutions for our clients. Regardless of location, terrain or timing, we deliver what is required where it is required. Our experience includes delivering perishable goods, specialty goods, oversize and irregular dimensioned cargo as well as providing dry and cold storage solutions. We brought together a team that understands the transportation business, paired them with a commercial team versed in customs, legal requirements and financial services overseen by operations and project management specialists who ensure every task, no matter the size is given due priority. We ensure that our clients have visibility of the process with capabilities for tracking and traceability.

Our services include:

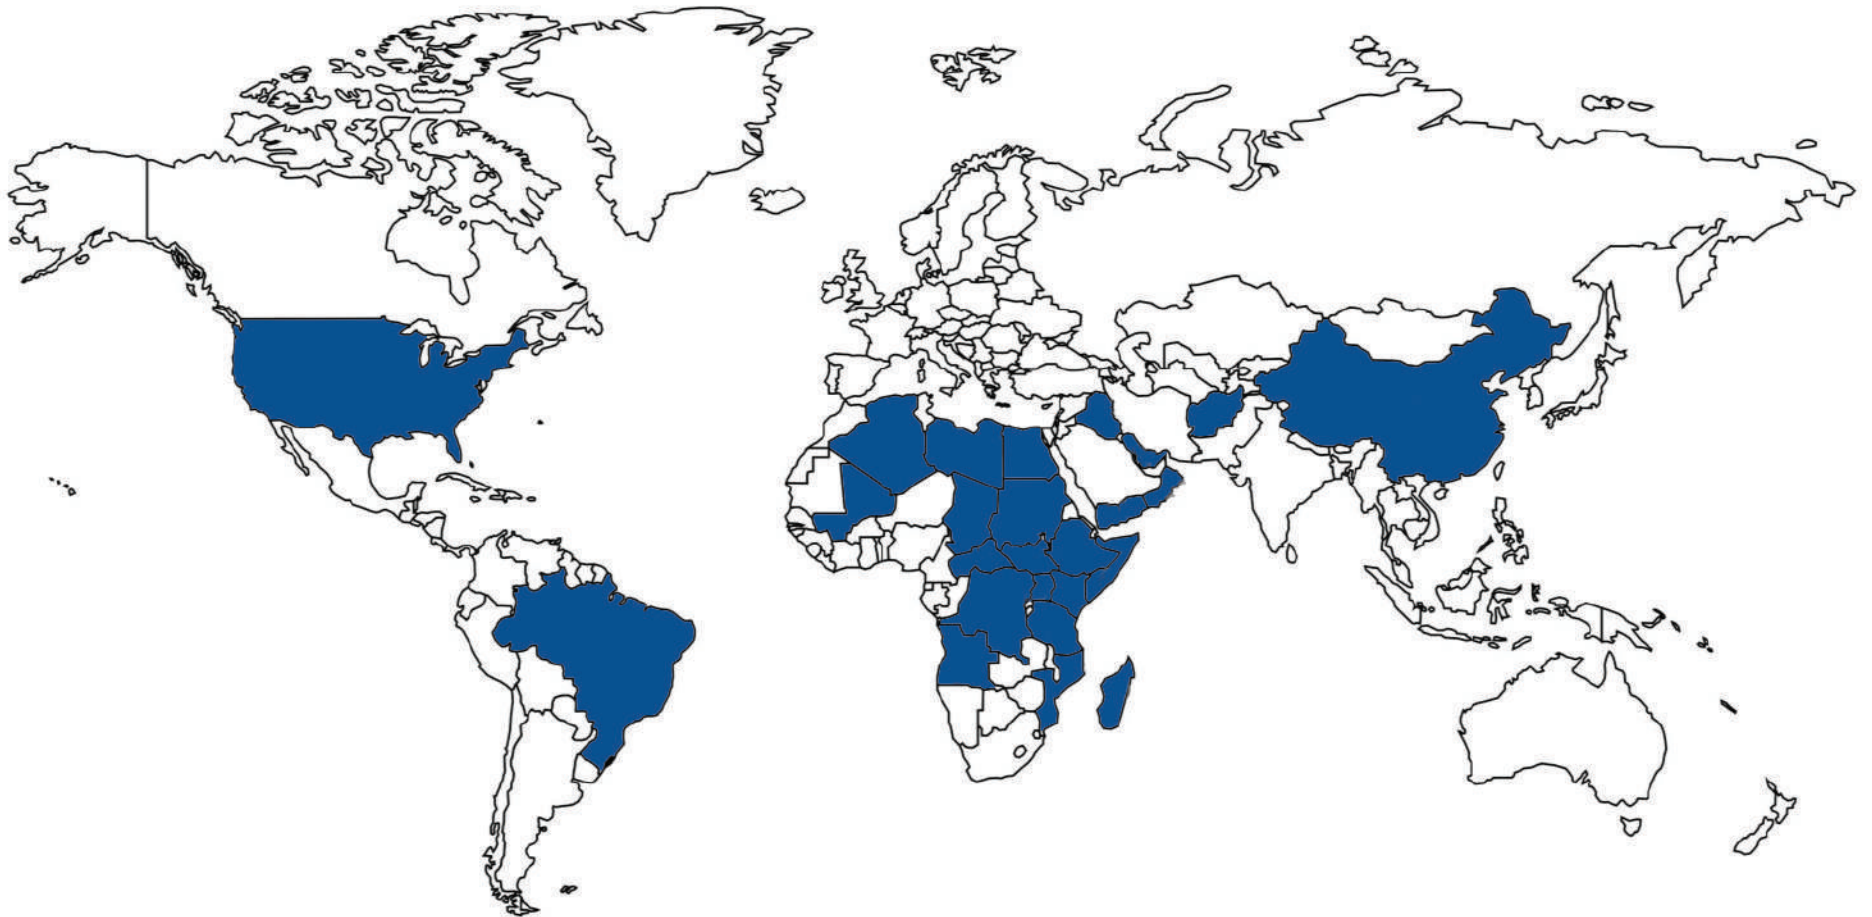

- Land, Air and Sea cargo transportation
- Fuel Supply
- Food, Water and Essentials Supply
- Storage and Warehousing Solutions
- Air and Sea Charters for Personnel

4. Construction Management Services

Atlas provides project management services for construction projects as well as undertaking work as a contractor. Our services include survey and design work, materials testing and consulting on national and international building codes, quantity surveying, engineering and provision of construction equipment. Our experienced team has worked on temporary and permanent facilities including security structures, accommodation, office spaces, warehouses and commercial kitchens. We also provide core and auxiliary services such as electrical, plumbing, landscaping, fire suppression and alarm systems and other utility installations. By working with Atlas, you can be assured that your project will be delivered cost effectively and with high standards exceeding the threshold set by national or international requirements.
